Subject: Radiation Safety and webIRB Changes

September 27, 2018

Dear UCLA Research Community,

On October 1, The Research Safety and Animal Welfare Administration (RSAWA) will be implementing *SafetyNet*, an online electronic submission and review system for human research projects that involve radiation and need Radiation Safety Committee review.

Once SafetyNet is implemented, the document upload and subsequent questions regarding radiation use will be removed from the webIRB application. Users will be able to log into SafetyNet to create their electronic application only after their webIRB application is submitted to OHRPP.

Further information on submitting to SafetyNet is available on the RSC website: <http://ora.research.ucla.edu/rsawa/rsc>

Thank you,

UCLA Office of the Human Research Protection Program
