Subject: webIRB and Multi-Factor Authentication

October 24, 2017

Dear UCLA Research Community,

As you may have already heard, UCLA Logon [Multi-Factor Authentication](#) (MFA) will become mandatory on Tuesday, October 31st (however, [a few UCLA Health departments](#) are not required to enroll in campus MFA at this time). MFA is a security enhancement that requires two forms of verification when using your UCLA Logon and adds critical protection for your sign-on credentials. webIRB uses the UCLA Logon to log into the system, therefore, you will need to enable MFA in order to continue using webIRB after October 31st (unless you are in a UCLA Health department that is deferring this requirement).

UCLA Information Technology Services has created a detailed guide for enabling MFA on your UCLA Logon, which can be accessed here: [How Do I Enroll in MFA?](#)

Please contact your local IT staff or [Bruin Online Help Desk](#) if you have support questions, and visit [MFA at UCLA](#) for additional information about the campus multi-factor authentication deployment.

Sincerely,
UCLA Office of the Human Research Protection Program
