

Tip Sheets for Media Interviews of Research Subjects

(last updated March 8, 2011)

Requests to interview past, current or potential research participants are not considered research. Therefore, the OHRPP does *not* review these requests.

However, all such requests *do* need to go through either

- the UCLA Health Services Media (click here for the [Contact List](#)) or
- The UCLA Newsroom Office of Media Relations and Public Outreach (click here for the [Contact List](#)) for general campus activities.

Both offices have very qualified and capable staff who know the procedures to follow to conduct ethical and appropriate interviews with research participants as well as patients and staff.
