

Grant Updates

September 12, 2019

DOD

DOD FY19 General Application Guidelines

- “For *all* previous (award period of performance ending within the past 5 years), current, and pending research support, include the title, time commitments, supporting agency, name and address of the funding agency’s procuring Contracting/Grants Officer, performance period, level of funding, brief description of the project’s goals, and list of the specific aims. If applicable, identify where the proposed project overlaps with other existing and pending research projects. Clearly state if there is no overlap.”

NSF

NSF Current and Pending Support

PAPPG 19_1 (February 25, 2019)

“... *all* current and pending support for ongoing projects and proposals, **including this project**, and any subsequent funding in the case of continuing grants. All current project support from whatever source (e.g., Federal, State, local, foreign, public or private foundations, industrial or other commercial organizations, or internal funds allocated toward specific projects) must be listed. The proposed project and all other projects or activities requiring a portion of time of the PI and any other senior personnel must be included, even if they receive no salary support from the project(s). The total award amount for the entire award period covered (including indirect costs) must be shown as well as the number of person-months per year to be devoted to the project, regardless of source of support. Similar information must be provided for all proposals already submitted or submitted concurrently to other possible sponsors, including NSF. Concurrent submission of a proposal to other organizations will not prejudice its review by NSF. The Biological Sciences Directorate exception to this policy is delineated in Chapter II.D.2.

- If the project now being submitted has been funded previously by a source other than NSF, the information requested in the paragraph above must be furnished for the last period of funding.”

NIH

NIH Other Support

<https://grants.nih.gov/grants/forms/othersupport.htm>

[NOT-OD-19-114](#)

“other support includes **all resources** made available to a researcher in support of and/or related to **all** of their **research endeavors**, regardless of whether or not they have monetary value and regardless of whether they are based at the institution the researcher identifies for the current grant. This includes resource and/or financial support from all foreign and domestic entities, including but not limited to, financial support for laboratory personnel, and provision of high-value materials that are not freely available (e.g., biologics, chemical, model systems, technology, etc.).”

NIH

FAQs - Other Support & Foreign Components

A researcher at my institution has 9 -month appointment. They spend 2 months at a University outside of the United States during the summer conducting research under a foreign award. Does this count as Other Support?

Yes. Available **resources** support of and/or related to an investigator's **research endeavors** should be disclosed even if they relate to work that is performed outside of a researcher's appointment period.

NIH

FAQs - Other Support & Foreign Components

I am a Principal Investigator on an NIH award to a domestic university and have an unpaid appointment a foreign university. At the foreign site I have access to lab space, research materials, and staff. Should I report this as Other Support?

Yes. While the researcher is not receiving monetary compensation, the lab space, materials, and staff are resources made available to them in support of and/or related to their research efforts. Other payments, such as travel or living expenses must also be reported. As outlined in [NOT-OD-19-114](#) this appointment must be reported as Other Support. NIH requires applicants to list **all positions & scientific appointments** both domestic and foreign held by senior/key personnel that are relevant to an application including affiliations with foreign entities or governments. This includes titled academic, professional, or institutional appointments whether or not remuneration is received, and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary).

NIH

FAQs - Other Support & Foreign Components

What is an example of an activity that is **not foreign component, but would meet the definition of **Other Support** ? What is the difference?**

This response is dependent upon specific details that surrounding the activity. For instance, one model could be that a PI on an NIH grant may have an appointment and a lab at a foreign university. The research being done at the foreign lab is unrelated to the PI's NIH project. This would **not** qualify as a foreign component of the NIH research, as the foreign work is not part of the NIH-funded project. However, it is a resource made available to the researcher in support of their research. Therefore, it **must be reported as Other Support**

NIH

FAQs - Other Support & Foreign Components

What are the consequences if “NIH determines that an institution is not complying with NIH policies for transparency & disclosure of all Other Support?”

may include the following...

- withdraw approval of PD/PI or other researchers on award
- adding special terms and conditions on award
- disallowing costs
- suspend or terminate award

OCGA Action Log - Intake
